PROFILE

Computer engineer with 2+ years of experience spanning Odoo ERP consulting and full-stack web development. Currently owning the Odoo.sh environment of a real-estate company, where I led the v18 to v19 production migration and rebuilt the custom modules. Equally comfortable analysing a business process with end users and building the software behind it.

PROFESSIONAL EXPERIENCE

Odoo Consultant & IT Support Oct 2025 – Present
Société Kahloun Immobilière — Sousse, Tunisia

- Led the **Odoo.sh migration from v18 to v19**: impact analysis, refactoring and adaptation of custom modules, regression testing on staging, and controlled production rollout.
- Administer **production, staging and development instances on Odoo.sh**, ensuring platform stability and availability for daily business operations.
- Build custom functionality with **Odoo Studio**: fields, views and forms, **server actions**, **automation rules** and **webhook triggers** integrating Odoo with third-party applications.
- Configure and support core modules — **CRM, Contacts, Accounting, Inventory, Purchase, Sales, Quality** — gathering user requirements and translating them into working solutions.
- Manage **access rights, user profiles and Microsoft 365 accounts** (creation, licensing, roles and permissions) in line with security policies and segregation-of-duties principles.
- Deliver **L1/L2 technical and functional support** and hands-on Odoo training, producing end-user documentation that reduced repeat tickets.
- Monitor **inbound and outbound network traffic** across workstations, with anomaly detection and escalation.

Full-Stack Developer Sept 2024 – June 2025
Euro Tech Conseil — Sousse, Tunisia

- Built responsive front-end interfaces in **Angular**, improving user experience and cutting task completion time by up to **70%** on core workflows.
- Maintained and extended **Symfony / PHP** back-end services, optimising performance, fixing defects and adding business logic for scalable applications.
- Designed secure, maintainable REST APIs with **Symfony API Platform** and **JWT** authentication.
- Set up **CI/CD** pipelines with **GitLab CI**, **Docker** and **AWS**, automating build, test and deployment for faster, more reliable releases.
- Implemented unit and integration tests with **Jest** and **PHPUnit**, achieving high coverage and reducing production regressions.

INTERNSHIPS

Full-Stack Developer — Final-Year Project Feb – May 2024
Anypli

Built a real-time collaborative platform with **React (TypeScript)** and **NestJS**. Integrated **Redis** caching and **WebSockets** to serve **2,000+ concurrent users at <200 ms latency**, added AI-powered recommendations and content generation via **Google Cloud AI APIs**, built an interactive **Leaflet** map system, and shipped through **GitLab CI/CD** onto a Forge PHP production environment.

Full-Stack Developer July – Aug 2023
ADN Expertise

Developed a **ReactJS / NestJS** application with **Redux** state management across complex UI modules, RESTful APIs backed by **MongoDB**, and Dockerized services deployed through **GitLab CI/CD** pipelines.

Front-End Developer July – Sept 2022
ENVA

Built a responsive **ReactJS** application focused on clean architecture and reusable components, integrating RESTful APIs for efficient and reliable data exchange.

EDUCATION

Computer Engineering Degree — Polytechnic School of Sousse	2021 – 2024
Classical Preparatory Cycle (MP) — Polytechnic School of Sousse	2019 – 2021
Mathematics Baccalaureate — Pilot Secondary School of Kairouan	2019

TECHNICAL SKILLS & TECHNOLOGIES

ERP & Business Systems: Odoo 18 / 19, Odoo.sh, Odoo Studio, custom modules, server actions, automation rules, webhooks, Microsoft 365 administration
Front-End Frameworks & Libraries: React.js, Next.js, Angular, TypeScript, Three.js, Tailwind CSS
Back-End Frameworks & Technologies: Node.js, NestJS, Express.js, Symfony / PHP, Spring Boot, Thymeleaf, Python
APIs & Data Access: REST API, GraphQL API, Symfony API Platform, JWT authentication
Databases: PostgreSQL, MySQL, SQLite, MongoDB, Redis
DevOps & Cloud: Docker, Docker Compose, Kubernetes, Nginx, Jenkins, CI/CD, GitLab CI, AWS Cloud
Version Control & Project Management: Git, GitHub, GitLab, Bitbucket, Jira, Trello
Software Modeling & Documentation: StarUML, Draw.io, Postman, Thunder Client, Swagger
Design & Collaboration: Figma, Agile / Scrum methodology
Networking & Systems: CCNA1 / CCNA2, network traffic monitoring, workstation administration

SELECTED PROJECTS

Harmony Academy — React TS, RTK Query, NestJS, MySQL, Redis, Docker, Google Cloud
Online platform for learning musical instruments, combining an e-learning module — live and recorded courses with scheduling and geolocation — with an e-commerce marketplace for buying and selling instruments.
Darija to Arabic — GPT-3 fine-tuning, RNN (LSTM)
Transliteration system converting Tunisian dialect to Standard Arabic, combining rule-based methods with machine learning and a dedicated error-correction layer for accurate results.
MediConsult — ReactJS, NestJS, Socket.io, MongoDB
Appointment management platform featuring an integrated real-time chat component for direct booking between patients and practitioners.

CERTIFICATIONS & LANGUAGES

CCNA1 / CCNA2 — Cisco Networking Academy (2022)	Arabic — Native
DELFB2 — French International Education (2023)	French — Fluent (DELF B2)
TOEIC — English, Amideast (2023)	English — Professional working proficiency

EXTRACURRICULAR

- Silver medal, national DevOps challenge "Comme un DevOps tu penses" — Nuit de l'Info (2021).
- Active member, Microsoft Club, Polytechnic School of Sousse (2021 – 2023).
- Socio-cultural project (2022): built Amena, a web application connecting charitable clubs with people in need.
